Visible is Beautiful

The cabinet is made of solid aluminum and finished with a highly polished "diamond cut" surface treatment. The stylish curves and high quality craftsmanship are elegant and designed to integrate harmoniously within modern interiors.

With this unique multi-directional array, the D Satellite Speakers series provides a high level of sound diffusion, reducing the annoying echo effects of traditional speakers.

Innovation with style

The Sound of Inspiration

Satellite Ceiling Speakers

we believe that music and design are able to enrich people's lives. With the humanistic thinking throughout the design, our team of engineers is able to make our products delivering music into the environment precisely and appropriately.

FLEXIBLE ARRANGEMENT

There are four different models within the Satellite range, to suit a wide variety of different locations and configurations.

UNCOMPROMISING PERFORMANCE

Optimum speaker projection is essential for creating the best surround effect, with the creative design of the satellite range, the performances will no longer compromise to the placement of the speaker.

In the most home theater arrangements, there is only one optimum "Sweet Spot" in which to sit. With its innovative multi-direction projection design, the satellite speakers series are able to extend the "Sweet spot" to a "Sweet Zone". Everyone in the room shares the same optimum audio pleasure!

The high-quality aluminum-alloy case is not only modernly and elegantly designed, but also perfectly matched with EP-01D4W2, the powerful coaxial driver which delivers delicate, clear, and ultimate sound effects throughout the entire frequency range. The Satellite Ceiling/in Wall series manages to match perfect sound effects with incredible design.

On top of that, the Low-Frequency Control Technology in Satellite Ceiling/in-Wall series is not merely to effectively maintain the "punch" in the bass but allows music to still be clear and pleasant even in noisy circumstances. Without disturbing people's conversations, people can clearly understand each other with no need to raise voice.
