

Integrated Home Automation

Imagine yourself with a Home designed fully with Integrated Automation and while sitting on your sofa in the comfort of your living room or relaxing privately in your bedroom or standing in a certain location in your home and from a single control point have the ability to control your entire house regardless if it is a single one bed room apartment, a luxury villa or an exquisite palace.

Sounds too good to be true, doesn't it??? Well...the time has arrived !!

With Integrated Home Automation, sitting or standing in one place you can control your whole home devices and apparatus whether it is lighting and ventilation, adjusting the AC temperature setting, listening to your favorite song or watching your favorite film and even insure that your home is completely secured.

Technology dominates all aspects of our lives these days. Whether it is our Personal Computer, TV, Electric Iron, Coffee Maker, AC or whatever, technology is there all around us. In the early stages, Home Automation was a fascination for the rich and elite across the world. However, with technology becoming cheaper and more economical, fully Integrated Home Automation is now becoming easier for the masses to consider and acquire the benefits and comfort offered through complete Integrated Home Automation Systems.

With the evolution of three well experienced and established organizations, Digitcom Technology, SMARTHOME and High Definition Living(HDL), this merger has formulated a new entity in the market place that manufacture and integrate Smart Technology for fully Integrated Home Automation . The new entity is now know as SMART-HDL and their strong belief is that “ It Was Technology But Now It Is A Lifestyle”.

With the arrival of Home Automation Systems being fully Integrated, life has seemingly become a bed of roses. To name a few, fully Integrated Home Automation systems offers the following advantages:

- 1).Saving of Time and Energy Costs,
- 2).Efficient execution of tasks,
- 3) Adds Personal Status,
- 4). Provides safety and security
- 5).Provides Comfort and Exclusiveness.

In addition, the affects of the Energy Crisis have been felt by everyone throughout the world. In today's environment more people are now receptive to using technology that can save energy and provide other cost savings both in homes, offices and various other commercial dwellings. Now in the 21st Century the significance and benefits of fully Integrated Home Automation Systems are playing an important role for new building owners with emphasis being on “SMART” and “GREEN”.
