

FLASH NEWS ON MALAYSIA'S A LIST PROJECT BY SMART-HDL

2010 was welcomed by Smart-HDL with lists of signed projects in both Dubai and Internationally. Mr. Firas himself is in fact was out of the country on his business trip when Big Ben's long hand stroke mid-night ending 2009.

In some ways and honestly it is a real big wonder that although the word "recession" is itinerant, yet since Smart-HDL's product is technically known and proven Energy and Cost Saving, User and Environmental Friendly applying the Green Concept Solution, Private Home Owners, Developers and Investors opts to adapt our solution for all their projects and these has made Mr. Firas' organizer with tick mark on every dates and months for his travel agendas only to sign and make site visits.

Among the already visited countries is Malaysia. Proudly during only a 3 days stay, Mr. Firas accomplished to furnish Dubai and China offices with the A List Projects that Smart-HDL has signed up, at which if this page I am writing on is Smart-HDL's Facebook Fan Page, I would have already clicked on the "like" word and gives out the "thumbs up" icon and wrote down my comments with the smiley and winking characters.

With great pride the A List Projects that Smart-HDL have in a long list are:

Nikko Hotel, Ritz Carlton Hotel – Kuala Lumpur, Avillion Hotel Port Dickson, Grand Paragon Hotel Johor Baru, Cyberlodge Resort Cyberjaya, Sunway Carnival Conventional Center Penang, GSC Cinema (East & West Malaysia) –Centers Including Alamanda in Putrajaya, Dewan Majlis Melaka, Felcra Auditorium Kuala Lumpur, Bukit Kiara Sky Lounge Kuala Lumpur,

Bungalow – 5nos, Sime Darby Conventional Center, Shah Alam Conventional Hall Selangor, Baker & McKenzie International Kuala Lumpur, The Legend Water Chalet Port Dickson, Menerung Luxury Condo Bangsar (Common Area & Penthouse), UITM Auditorium Melaka, UUM Alor Setar, Amway HQ, Lotus Cinema – 2 Centers, Millennium Square Ipoh.

From these projects mentioned, we are only on the Third month of the year 2010, so do expect that when Big Ben's long hand strikes at midnight ending year 2010, Smart-HDL already established its flag in the Universe just as Neil Armstrong did when NASA aimed to reach the moon.
